

ENHANCE YOUR COUNTERTOPS

Once you have selected your countertop material, color and finish there are many important details to consider before we can bring your vision to life – and our team of experts are ready to help. We offer the essentials, along with a variety of design options to bring your unique style into your home, and affordable services to make the installation process easy. Our team will guide you and discuss the following items based on the needs of your project.

ESSENTIAL ELEMENTS

Sinks & Accessories

Select from a complete line of sinks and accessories to complement your budget and lifestyle. Choose from stainless steel, composite or porcelain sinks in nearly every size and configuration. Grids and strainers available for most sinks.

Brackets

Add brackets to discretely support your new countertop overhangs. Our thick steel brackets are professionally mounted during your install to cabinets and walls to support the weight of your new tops. Available in many styles and configurations.

ADDITIONAL SERVICES

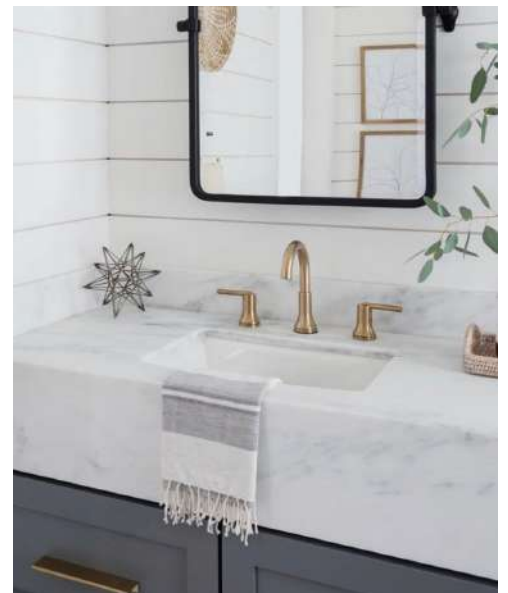

Tear Out and Disposal

Our trained install team will remove and haul away your old countertops on the same day your new tops are installed. This means there is no disruption to your kitchen or bathroom until the day of your install, saving you time.

Plumbing

Avoid hiring another contractor to complete your project. Our professionals will reconnect your plumbing within 24 to 48-hours of install.

ENHANCE YOUR COUNTERTOPS

ENHANCEMENT OPTIONS

Sink Chip Minimizer

The most common service calls are in the kitchen from pots and pans chipping a sink's edge. While repairs can cost \$400 - \$600, it is important to protect your investment. Add our revolutionary Sink Chip Minimizer to provide a layer of impact resistance by adding a rounded edge along the inside of your sink cutout. A Sink Chip Minimizer is ideal in bathrooms to soften and round the edge of your sink for a clean, aesthetic look. *Available only on Natural Stone and Quartz.*

Digital Layout

When selecting a material with heavy veining or a pattern, it is recommended to include a Digital Layout. This service uses high-resolution images of your actual slab(s) to show the veining and seams to see how your countertops will look before they are fabricated and installed.

2CM Splash

A new twist on a timely design, the slim look of a 2CM splash will give you more room between your faucet and your backsplash.

Edge Profile

Add stunning detail to your countertops when you customize your edge profile. We offer a wide selection of beautiful edge designs to help you create custom countertops to suit your style.

Stain Warranty

Add a 15-year Stain Protection Warranty to safeguard your Natural Stone against accidental staining caused by common food and beverages. Our hassle-free residential countertop warranty will protect your investment and provide peace-of-mind. And, it's transferrable for the remainder of the warranty period should you choose to sell your home.

Inquire today to include any of these enhancements in your project.
We're looking forward to bringing your countertop vision to life!
